Master Tower: Elevating Excellence

Our Vision: "To be the preeminent provider of telecom tower solutions in Thailand and the region."

Master Tower is a leading provider of comprehensive steel tower solutions, specializing in:

- **Design Consultancy:** Expert guidance from concept to completion.
- **Production:** State-of-the-art manufacturing for superior quality.
- **Sales & Distribution:** Seamless delivery of tailored tower systems.

Our Focus: We are dedicated to "Creating value for our customers" by delivering:

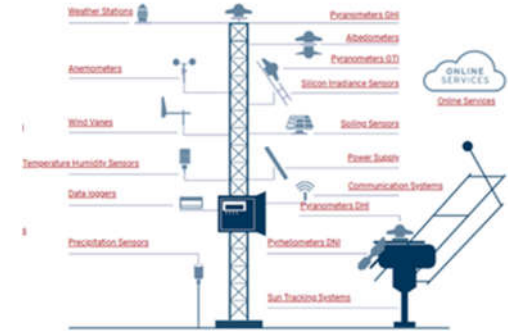

- **Broadcast & Communication Towers:** Supporting reliable TV, radio, and telecommunications networks.
- **Meteorological & Wind Monitoring Towers:** Enabling accurate weather forecasting and renewable energy development.
- **Wind Turbine Towers:** Supporting the growth of sustainable energy solutions.

Quality & Standards: Our commitment to excellence is reflected in:

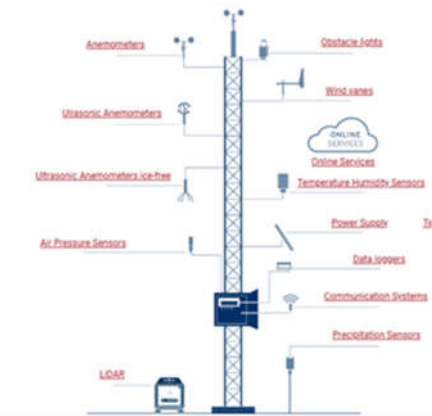

- **Adherence to International Standards:** ISO9001:2008, EIA/TIA /RS222-G, IEC, and relevant local regulations.
- **Skilled Workforce:** Our welders are certified to the AWS D1.1 Standard by the Thai Welding Society.

Our Products

Self-Supporting Towers

- **Space-Efficient Solution:** Requires less land area compared to guyed towers.
- **Robust Construction:** Designed to withstand various loading conditions using high-strength steel.
- **Customizable Designs:** We can design and engineer towers to meet your unique requirements and specifications.
- **Comprehensive Documentation:** We provide detailed design calculation manuals for each tower.

Guyed Towers

- **Cost-Effective Solution:** Guyed towers provide an economical way to achieve significant heights.
- **Flexible Design:** Available in various configurations, including lattice and tubular designs, to suit different applications.
- **Wide Range of Sizes:** We offer a comprehensive range of tower sizes to meet your specific needs.
- **Ideal for Various Applications:** Suitable for AM broadcast, two-way communication, cellular, CATV, microwave, FM, and TV broadcast.

Wind Data Loggers and Sensors

“Monitor and Analyze Wind Data with Precision”

- **Agriculture:** Optimize crop yields and irrigation schedules.
- **Energy:** Assess wind resources for renewable energy projects.
- **Research & Development:** Conduct in-depth meteorological studies.
- **Home Weather Monitoring:** Gain insights into local weather patterns

Guy Wire Accessories

Our Services

“Comprehensive Tower Solutions”

• Site Development

- Feasibility Studies
- Site Acquisition
- Zoning & Permitting
- Geotechnical Services

• Construction & Installation

- Site Preparation & Construction
- Civil Construction
- Foundations
- Tower Installation
- Antenna Installation

• Maintenance & Inspection

- Structural Inspections
- Site Maintenance
- Maintenance Services

• Engineering & Design

- Tower Design & Fabrication:
- Tower Mapping
- Foundation Design
- Tower Calculation
- Custom Fabrication

• Installations

- Grounding Systems
- Tower Painting & Lighting

• Other Services

- Windmill Towers
- Microwave Antenna Installations
- Rooftop Installations
